Crushing and Aggregates

LMT Enterprises offers a number of services in this area:

Gravel-Crushing Facility/Custom Crushing

LMT provides an efficient, economical solution for the processing, crushing and screening of aggregate materials to practically any specification. We can provide services at either our gravel pits or our customers' gravel pits. Crushing contracts are based upon site proximity and the type of material to be crushed.

Aggregate Pits

We have aggregate pits located in various areas of southeastern Alberta and southwestern Saskatchewan.

Concrete and Asphalt Recycling

We specialize in crushing, processing and recycling highway and residential pavement and building-demolition concrete. We also accept broken concrete for recycling which we process into recycled granular-base material.

Some of the environmental benefits of concrete and asphalt recycling are:

- conserves natural resources
- reduces waste sent to landfills
- cuts the use of fuel in transporting materials
- Saves energy associated with mining and processing new aggregates

Here is an overview of our Aggregate products

- Screenings & Bedding Sand
- Road Crush
- Clean Road Crush
- 1½" Road Crush
- 2" Road Crush
- 3" Road Crush
- 3/8" Natural Round Pea Gravel
- 1/2" Natural Round Pea Gravel
- 1/2" Natural Dirty Pea Gravel
- 1/2" Rock
- 1" Rock
- 2" Ballast
- Gabion Rock 3-8" (50% fractured)
- River Rock 1 - 3"
- River Rock 3 - 6"
- Concrete Sand
- Masonry Sand
- Screened Topsoil (with/without)
- Unscreened Topsoil
- Fill Dirt
- Slab jacking
- Manufactured Fines
- 1/2" & 5/8" Asphalt Material
- Pit Run
- Manure
- Millings
- Good Clay Fill
- RIP RAP
